Work Experiences

[2022 Nov – 2023 April]

On Job Training

Host Myanmar Mandalay (Tech Space)

During my time at **Host Myanmar Mandalay (Tech Space)**, from November 2022 to April 2023, I actively contributed to the development of various web-based solutions. I gained hands-on experience with PHP, Laravel, HTML5, CSS, JavaScript, and Bootstrap, ensuring the seamless functionality and user-friendly design of these applications. My efforts significantly enhanced the company's reputation for delivering high-quality software solutions.

[2023 May – 2023 June]

Internship (Junior Web Developer)

Host Myanmar IT Software Company (Yangon)

During my time at **Host Myanmar Software Solutions**, I spearheaded the development of a range of web-based solutions, including HR systems, library management systems, and multiple POS (Point of Sale) systems. Through hands-on experience with PHP, Laravel, HTML5, CSS, JavaScript, and Bootstrap, I ensured the seamless functionality and user-friendly design of these applications, contributing to the company's reputation for delivering high-quality software solutions.

[2023 July – 2023 Nov]
(Contract)

PHP Developer

Secret Code Company Limited (Yangon)

During my tenure at **Secret Code Company Limited**, I spearheaded the successful development of a comprehensive Shopping Mall Website, leveraging a diverse skill set encompassing HTML5, CSS, JavaScript, Bootstrap, Angular, Laravel, MySQL, and PHP. From front-end design to back-end functionality, I meticulously implemented features and functionalities, ensuring a seamless user experience and efficient database management. With expertise in both front-end and back-end web development, including proficiency in Angular, I contributed to the creation of a robust and visually appealing e-commerce platform that met the client's requirements and exceeded expectations.

[2023 Nov – Present]

Analyst Programmer

KBZMS General Insurance (Yangon)

During my role as an Analyst Programmer at **KBZMS General Insurance**, my responsibilities primarily revolve around frontend web development for the Insurance Digital Core System. Specializing in Angular, I spearhead the development and refinement of UI designs, ensuring an intuitive and visually appealing user experience. Additionally, I actively engage in API integration tasks, collaborating closely with backend developers to seamlessly connect the frontend interface with the system's backend functionalities. Through this multifaceted approach, I contribute to the enhancement and optimization of our digital insurance platform, aligning it with industry standards and meeting the evolving needs of our users.
